Swiss designed pet products

About us

Mark Zimmermann & Kylie

Roland Primus

It all started with Kylie in 2010, the female Norfolk terrier owned by Mark. She provided the inspiration that led him and Roland Primus to establish curli. Kylie is a small dog who struggled to fit comfortably in to a regular harness. We realized there was a need for a better fitting and more comfortable harness in the market and we knew we had to pursue it.

Mark and Roland come from the Canton Valais & Grison in Switzerland. Before curli, we were both active in outdoor and winter sports. "Our outdoor experience was of great benefit when it came to the design of our products. Our knowledge helped us to create products that provide the best possible solution for the good of the dog, and thus strengthen the bond between man and dog."

We both have backgrounds in outdoor and winter sports. This experience, combined with our passion for snowboarding and mountain sports, has resulted in us being friends since 1993. As an experienced team, we continue to complement each other when it comes to curli – our joint venture.

curli upholds the traditional Swiss values of quality, functionality and reliability.

Function

Through our products, we want to deepen the relationship between hu-

mans and animals. All items must be absolutely reliable to strengthen and consolidate trust. Thus, humans and dogs can fully enjoy their experience in nature.

In order to achieve this, we look at every little detail of the production process. Carelessly placed seams or rivets may interfere with the dog's comfort. Therefore we handpick all materials and their design structures and each step of the process is developed and personally overseen by us.

Here at curli, we believe that the bond formed between man and dog strengthens with every new adventure – we hope our products will enhance that bond.

Added value

All curli products have an added value for our customers. Our products come with additional features that set us apart from our competitors.

At curli, we believe that safety has to be at the heart of a product's design, so rest assured, we always have that forefront in our minds.

Our claim

We are Swiss, so we have an eye for detail. We love to focus on the tiniest details. Only if a product meets our high standards in terms of quality,

function, design and reliability, will we allow it to be produced for the market. curli products provide many unique value added features - such as the "DogFinder ID" - the integrated dog tags in each curli product that help you find your animal, should it ever get lost. Another example of the versatility of our products is the luumi LED lights. luumi LED lights are automatically delivered with several mounting options, so you do not have to buy them individually.

Design

The design of our products is about more than looks alone. By design, we give our products added value and a high degree of versatility. Each dog is built differently and has its own needs. Our products are so expertly designed for comfort, that your dog will hardly know it is wearing a harness at all.

Mission & Values

Trust

curli helps owners build a bond of trust with their dog, by giving them better tools to control and communicate with their dog.

We rigorously test and manufacture our designs to the highest standards, so customers can always rely on curli products.

Safety

curli products are for owners who want the best for their dog.

A curli harness enables owners to control their dogs with confidence, knowing they'll be safe, secure and comfortable.

Light but still robust, our harnesses are ergonomically designed and available in a range of sizes, so every dog can enjoy a perfect fit.

Functionality

Our Swiss heritage means we take extraordinary care to get every small detail right.

Each product in our assortment is designed with both dog and owner's needs in mind.

We've developed features you won't find elsewhere, such as a magnetic closing system that allows owners to attach a leash with one hand. Our free DogFinder service helps owners retrieve their lost dogs using a unique ID supplied with every harness.

Partnership

Our customers and retail partners trust us to provide consistently excellent design, quality and service.

We'll always strive to provide what you need – and won't try to sell you products you don't need. We're driven by customer satisfaction, not maximizing sales.

Innovation

We're the most innovative harness brand on the market, constantly working on new ideas to make our products even better. And when it comes to quality, only perfection will do (we are Swiss, after all).

Expertise

As the leading harness specialist, we have a wealth of knowledge to share. We can provide information and advice on harnesses, dog safety and communication.

curli stands for

- Leader in communication
- One of Europe's leading suppliers of premium dog harnesses and accessories.
- Extraordinary attention to detail and a scientific approach to functionality and design, unmatched in the industry, inspired by mountaineering and winter sports.

We know that a harness should never be more than 2% of body weight, but many are two, three or four times heavier than that! It's like you wear a 5-8 kg / 18.73 lb jacket every day!

Missing dogs find home faster

With the purchase of a curli dog harness, the integrated DogFinder service is immediately available for free.

The DogFinder is a unique additional feature exclusive to curli products and at no additional cost! The service is free and will provide you with a valuable extra function to help you recover your dog in the event that it should go missing.

In a nutshell, the process couldn't be simpler. On receipt of your curli harness, register your unique DogFinder ID – it is located under the DogFinder tag on the harness – and enter the details on the secure Swiss hosted database attached to the curli server.

How do I use the DogFinder ID?

Just log on to the website <http://dogfinder.mycurli.com> and register your details and those of the dog that is associated with the DogFinder ID. It is possible to register multiple harnesses for the same dog or multiple dogs for the same owner! This database means it will make the process of finding your lost dog much simpler.

My dog is missing - What now?

Here are two potential scenarios: Scenario A: The owner has lost his dog and takes the following action: Firstly, he goes to the website and tells the system his dog is missing. The system will notify shops and other registered DogFinder people in that area to look for the dog that is lost, stating the relevant DogFinder ID number XXXXXX. The System will provide the name of the dog and, if available, a picture as well. However, under no circumstances will any of the owner's personal data be revealed. Armed with this vital information, the search can begin for the missing dog in its curli harness. When the dog has been located, then they need to inform the DogFinder system.

Scenario B: The finder of the missing dog wants to know who owns it, so that it can be returned to its owner. With the DogFinder IDTM he can tell the system that he has found the dog, with the DogFinder ID number XXXXXX and the system passes the information on to the owner, thus connecting owner and finder, so the dog can be returned.

A success-story

The system is unique in its design and functionality and has been in operation for the past two years, with over 10.000 subscribers to the DogFinder ID. It never reveals the owner or their details, so has proven itself to be secure and reliable.

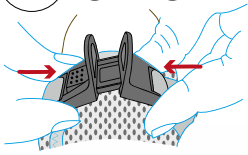

The system is simple and runs itself twenty four hours a day, seven days a week. We believe it is a smart use of the internet and a valuable, free service for our curli product range users. It is a widely used service, especially since smartphone ownership has exploded. It really is a great feature – it is free, so what is not to love?

NEW - The simplest and safest dog harness closure in the world. The curli clasp

PATENTED

1 CLICK

2 SNAP

3 GO

Ultrastrong and safe POM-clasp and D-ring all-in-one.
Up to 100 kg|220 lbs. / M - XL
70 kg|154 lbs. / 3XS - S

New improved harness cut with enlarged leg openings for maximum freedom of movement without chafing

3D Comfort Fit

Ultralight only 42 g (1.5 oz.) (Size S)

Crossed webbing straps sewn into the seam for the best tension distribution and maximum comfort

The curli Air Mesh harness has been popular for years and is one of the absolute bestsellers. Nevertheless, we at curli are not resting on our laurels, but are constantly working on further improvements and looking for ways to make the harness even lighter, even more robust and even more comfortable. With the curli Clasp harness, we are now presenting an all around improved harness that once again raises the industry benchmark to a new level.

The most important feature that immediately catches the eye is the new buckle. The patented curli clasp buckle sits at the top of the harness and offers the dog owner maximum ease of use. With one click, the harness is secured and can then be put on a leash with just one hand. This makes it easier to prepare even very lively dogs for walking, even when they are on a leash. It is made of polyoxymethylene (POM), is colour-coordinated with the harness and is extremely robust. The buckle can withstand tensile loads of up to 100 kg.

The other improvements are better hidden, but offer many advantages, especially for the dog. The new harness is another 20 % lighter. At the same time, it offers improved ergonomics and an optimised fit thanks to new cutting patterns and a new size scale. When the dog pulls on the leash, the weight is now even better distributed over the harness. To achieve this, the straps are sewn directly into the harness and have been processed for higher tension absorption. The air mesh material has also been improved and now offers even more comfort. In addition, it can be easily adjusted to the shape of the dog's body with Velcro fasteners and thanks to the padded buckle, there is no chafing in the coat. All in all, the new harness is another big improvement and has the potential to soon outstrip the current bestseller.

Beagle
Stretch Comfort Leash Ruby
Vest Harness curli Clasp Ruby Size L

Vest Harness curli Clasp

The new edition of the bestseller

Function & Design

New improved harness cut with enlarged leg openings for maximum freedom of movement without chafing

Lightweight, air permeable stretch Air-Mesh cooling effect when immersed in water

42 gr / 0.11464 lbs (Size S)

3XS to XL from Chihuahua to French Bulldog

- The new “curli clasp” solves one of the industry’s biggest challenges. Now the leash and harness can be attached with one hand
- High-strength, color-matching POM material for the clasp, withstands tensile loads of up to 100kg (220 lbs)
- “curli clasp” reduces noise and weight. Eliminates the “clicking” sound of metal D-rings.
- Harness with around 20% lower weight than the already particularly light previous model
- Significantly improved ergonomics and optimized fit thanks to a new pattern and a new size scale
- Perfected tension distribution thanks to the straps directly worked into the seams of the harness and improved higher tension mount
- Optimized Air-Mesh material for even greater comfort
- Adjustable in size with Velcro closure, easy to adjust to the body shape
- Padded buckle ensures that hair and fur is not snagged or irritated
- Reflective elements on the neck for additional safety in darkness

MERINO WOOL
NATURAL PRODUCT

Advantages of Merino Wool?

Merino wool is a natural product and a particularly high quality form of (Virgin) wool. It is obtained from merino sheep and is characterised by its special delicacy and softness.

The main properties and advantages of Merino:

- Doesn't smell (even after long wear) and therefore has to be washed less often
- Is sustainable and grows back
- Does not charge electrostatically (unlike synthetic materials)
- Insulates well in cold and also in heat
- Transports moisture
- Can absorb moisture up to a third of its dry weight in without feeling clammy
- Cools through evaporative cooling at warm temperatures
- Insulates even when damp
- Maintains the fit without becoming misshapen
- Has a natural sun protection factor of up to 50 (depending on density and weave)
- Is biodegradable (like wool in general)

Vest Harness Puppy Set

Quality and ergonomics from the beginning

All **NEW** tailored cut

The first encounter with a puppy is something one usually remembers years later. It's always amazing how these little animals instantly capture everybody's heart. In order to be prepared for the first walk together, we developed the Puppy Set. The set includes a light and ergonomic curli vest harness Air-Mesh with matching leash and integrated DogFinder ID. This offers you and your new companion everything for carefree walks. Moreover, with the integrated DogFinder you will have peace of mind should your puppy run away.

Vest Harness Softshell

For our outdoor enthusiasts

All **NEW** tailored cut

The Softshell harness came from a need for maximum protection and comfort for dogs that walk daily during cold weather. With our Alpine experience, it was clear to us that Softshell was the material of choice. Softshell is warming, wind resistant and water repellent, but you need know-how to process it. We learned a lot during its production. The material posed problems when it was fed into the sewing machine. Only after several attempts, did we find a suitable solution. The result is a vest harness with the warming and water-repellent properties of soft shell. Ideal for colder days.

Magnetic Vest Harness

The self closing harness that's as light as a feather

All **NEW** tailored cut

Imagine, you have to wear a jacket that weighs six kilograms (or 13 pounds). Not a particularly comfortable thought. Many dog harnesses are far too heavy in relation to the dog's body weight. That's why we improved our design and reduced the weight to 49 gr / 0.108 lbs (Size 2XS), or just two ounces. If you convert this to human terms, it equates to wearing a light, casual jacket. In addition, the harness has two magnetic D-rings on the right and left. They stay together, so that you can easily attach or remove the leash with just one hand.

Basic Harness

More control - better communication
even if the body shape is difficult

As a dog lover, you know that dogs come in all shapes and sizes. We were able to use our experience as designers to accommodate these different forms. After a whole host of fittings, we overcame the challenge and came up with the ideal solution: The Basic Air-Mesh in six basic sizes and an adjustable strap around the trunk area. To distribute the tension on the leash in the best possible way, we have added two eyelets – one at the front near the neck area for more direct control and a further one, slightly higher up that works when the dog pulls harder.

Rhodesian Ridgback
Belka Comfort Harness Black Size L
Weight 34 kg / 74.95 lb

Belka Comfort Harness

The best way to control your dog, without choking, or compromise in weight, simplicity and ergonomic

When developing a new dog harness, we always ask ourselves how many adjustment options it needs.

More adjustment options mean more straps, seams and eyelets and thus more material, weight and less flexible dog harness parts. The answer: As little as possible and as many as necessary. A study with more than 100 dogs shows, that the freedom of movement is far superior with fewer adjustment options. Based on this knowledge, we have developed the Belka Comfort. It is lighter, more ergonomic, easier to handle and fits better - despite fewer adjustment options - as it is more flexible and adapts to the dog's body.

Belka Harness

Makes walking larger dogs easy and more comfortable, with all adjustment options

The requirement for a harness suitable for big dogs is quite different. The pulling force of a large dog creates completely different demands on the materials and the shape of the breastplates.

We had three years of intense development before we came up with the Belka breastplate. The placement of the buckles and choice of material took into consideration the complexities of the strain of a pulling dog and the stress the materials will need to endure because of that. Next, we had to make sure that the harnesses allow the dog freedom of movement, while making sure the handler remains in full control. In order to achieve this, we placed eyelets in the front and the rear - the front for more direct commands and the rear for more athletic activities.

The Belka Harness is named after one of the first two dogs to go into outer space and return safely to Earth, as part of the Soviet space program in 1957.

Belka Harness Red Size L
Weight 36 kg / 79.36 lb

Belka Harness

Function & Design

Adjustable on the neck and chest

Lightweight, air permeable stretch Air-Mesh cooling effect when immersed in water

310 gr / 0.683 lbs (Size S)

S to XL from Border Collie to Rottweiler

- Size adjustable around the neck and chest for an ideal fit
- Velcro closures at the neck area to help setting the neck circumference
- Padded buckles and thus no pressure points
- Two D-rings to attach the leash, on top of the neck for optimal control, in the back area for pulling use
- All around reflective seams for added safety in the dark
- Padded handle for holding and lifting
- Reinforced wired seams for better dimensional stability

Stretch Comfort Leash

The shock-absorbing and comfortable rope leash for chooke- and stress-free guiding and commanding

Suddenly the dog sees something and his instincts lead him to start running. This develops enormous powers, which can injure both dog and owner. That is why curli has developed a rope leash that significantly reduces the jerk when a dog is being restrained. The core and sheath of the rope can be adjusted. This is more convenient for everyone and ensures safe command transmission.

Function & Design

- 1,8 m / 5.9 feet long
- Ø 8 mm / 0.31 inch (M) or Ø 10 mm / 0.39 inch rope diameter (L)
- For dogs up to 25 kg / 55 lb (M) or up to 40 kg / 88 lb (L)
- Shock absorbing rope for stress-free control
- Ultra-soft rope for the best comfort and safety
- Dog waste bag holder
- Snap-in safety carabiner
- Better haptic perception compared to a normal leash

Ultra Strong Pocket Leash

The smallest, lightest and strongest leash

From our time in outdoor sports, we know that every tool needs to be small, light, comfortable and functional - without compromises. We apply this principle to our new Ultra Strong Pocket Leash. All components are made of the best materials that modern technology has to offer. The base material is Dyneema, a high-quality fibre, which is 1.7 times stronger than steel. For the hand strap, we use variable webbing for more comfort and with the splice technology we achieve unbreakable seams. In addition, we integrate a stainless steel snap hook-carabiner. All of these components combined create the most compact, lightest weight and strongest leash on the market.

Function & Design

- Ultra strong Dyneema rope 1.7 times stronger than steel
- Spliced loops on the Dyneema rope for a long and safe product life span
- Variable Webbing hand strap, the most comfortable hand strap on the market
- 2 lengths available: 160 cm / 63 inch & 110 cm / 43 inch Pocket foldable, the leash disappears in your pocket it's so small and foldable
- Ultra light, it feels as if you do not have a leash in your hand
- Stainless Steel snap hook, 5 times stronger than regular snap hooks
- Dog waste bag holder; to always have a poop bag at hand

Basic Leash

The simplest connection to your dog

Unfortunately, we often have to put our dogs on the leash. Therefore, we wanted to make a virtue out of necessity and developed the Basic Leash.

In everyday life, we realized what is required of a leash. And most importantly, what features are needed to meet those demands.

Function & Design

- 140 cm / (M) 4.6 feet x 1.5 cm / 0.59 inch or (L) 2 cm / 0.78 inch
- Metal ring to attach accessories
- Dog waste bag holder
- Matching safety snap hook and ring as curli harnesses
- Padded handle, comfortable and optimal grip

Adjustable Leash

Triple adjustable, comfortable, flexible and multifunctional

It took a long time to find the right material for our leash, because we had a clear idea of the feel and weight we required, combined with the material being able to meet our safety requirements. In addition, the lead has to be able to be held comfortably in any position.

We finally found the solution by using integrated "Tube - Nylon".

The fine weave that is exclusive to curli, meets our requirements. In addition, the material is tear resistant and long-lasting. The leash comes with a Dog Waste Bag Dispenser and sports the highest quality eyelets and carabiner. You will be hard pressed to find a better quality lead, with this level of detail and useful as a pocket-knife, for sale anywhere.

Function & Design

- 200 cm / 6.56 feet x (M)1.5 cm / 0.59 inch or (L) 2 cm / 0.78 inch
- 3 way adjustable lead with closed metal ring
- Matching safety snap hook and rings as curli harnesses
- "Tube Nylon" that's finely woven for the very best grip, control and security
- Dog waste bag holder

Car safety belt

Safety in the car while travelling Can be fixed in many ways

We are often in the car with our own dogs and know that we should secure small dogs in a crate. However, this is often impractical on short journeys. A simple solution was needed. We hearkened back to our outdoor pursuits days and found the answer in mountain sports – a single-handed use system with a safety locking carabiner that can be mounted in the normal click lock of the vehicle seat belt. Used in combination with a curli harness, it provides a perfect, safe and secure solution for short distances.

Be careful!

Never leave a dog alone in the car, particularly in the summer. A car rapidly becomes hot like an oven.

Function & Design

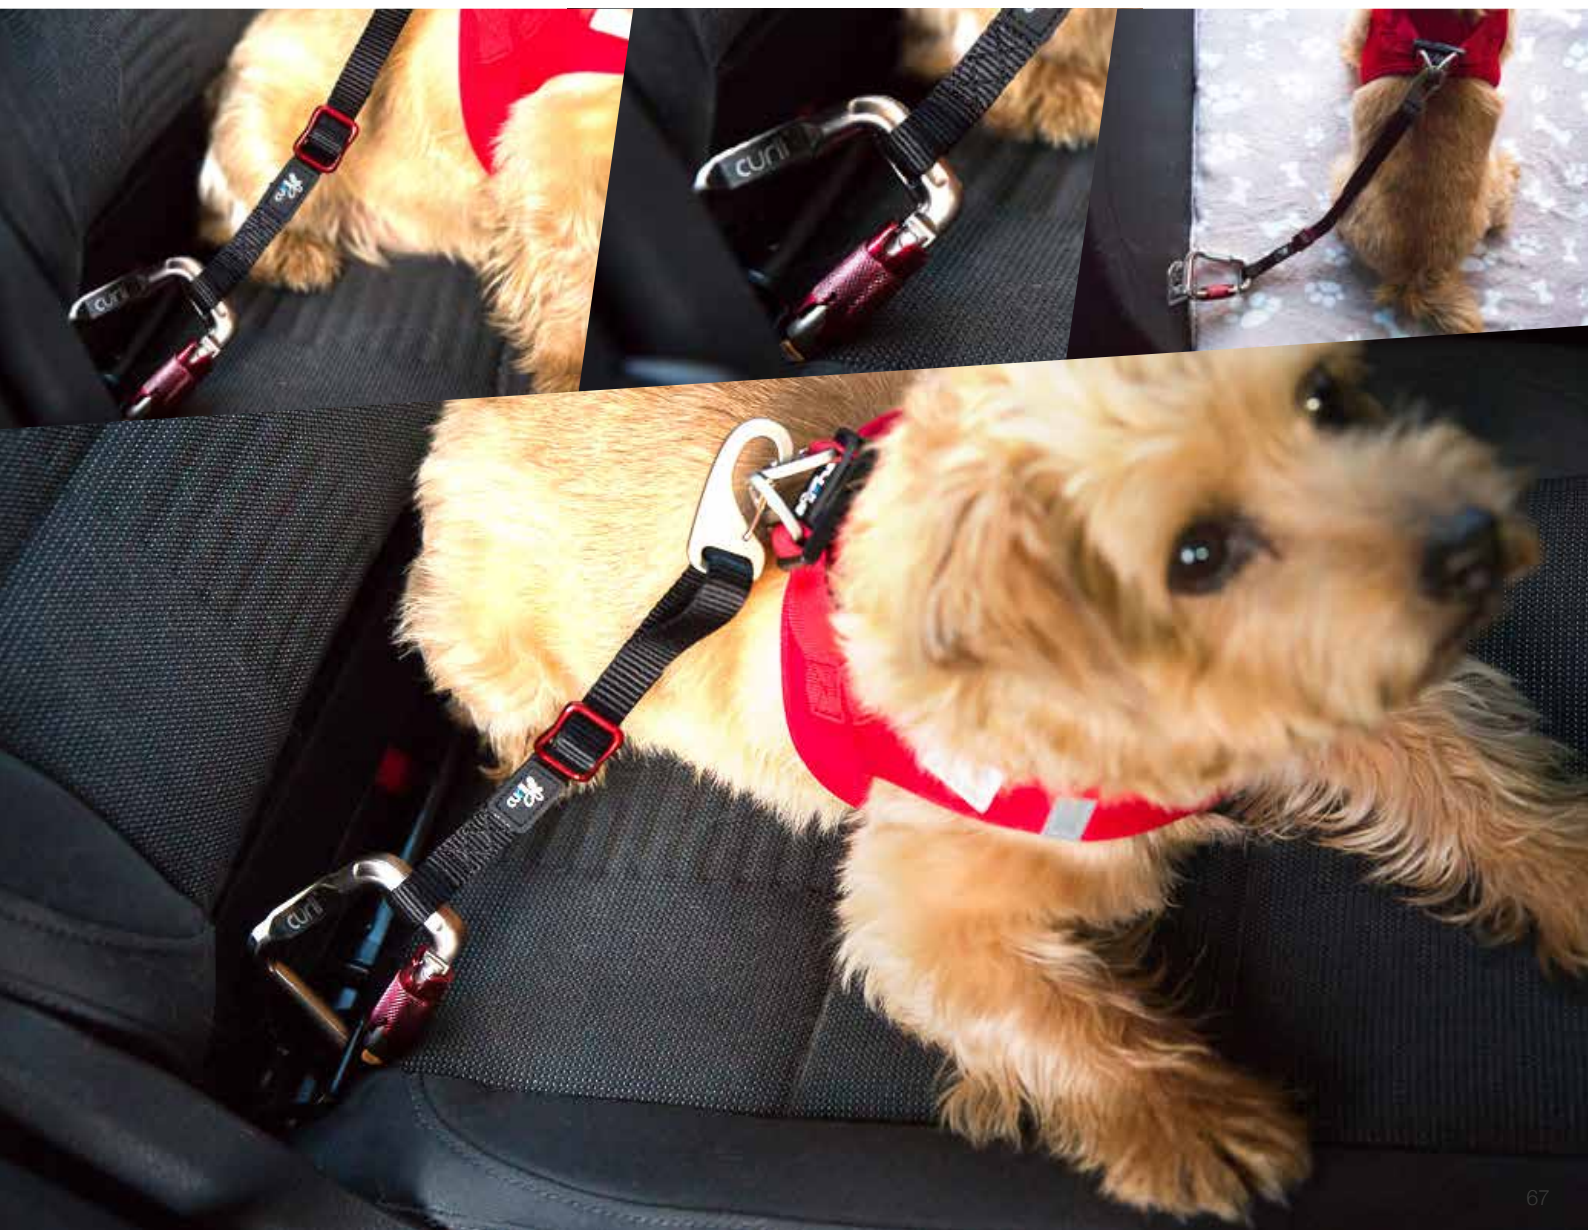

- Multiple uses, with the seatbelt or, with the iso fix system in newer cars
- Two sizes M max. 30 cm / 11.8 inch and L max. 60 cm / 23.6 inch
- Length adjustable for better range of movement
- Extra secure twist lock aluminum carabiner
- Lightweight, therefore not disturbing the dog

L 60 cm / 23.6 inch PN1333

The multifunctional safety LED light, super light, powerful and in a double pack

From our outdoor activities we know headlamps. On the one hand, they help us see where we are going and on the other, help us to be seen. When we developed an LED light for dogs, we bore the same safety requirements in mind when we set about designing it. It had to be light enough to be used on very young dogs. In addition, you can attach it where it makes the most sense – be it on the collar, leash or harness. Another requirement of lumi was that it does not give up the ghost even in the heaviest rain or snow. For this, we constructed the silicone shell. We are very proud of the result that is lumi – it's small, light and flexible.

Function & Design

10gr

- Bright blue LED's from the latest generation for best visibility
- Ultra light, only 10g
- Small, only 32 mm / 1,25 inch in diameter and 11 mm / 0.43 inch high
- Silicone housing and therefore Splashproof
- Flashing: Approximately 400 hours burn time
- Permanent: Approximately 180 hours burn time
- 6 flexible silicone bands in three sizes for variable attaching options 2 lumis per box (incl. batteries) to be seen all around
- Easily replaceable batteries without tools needed

Treat Bag V2

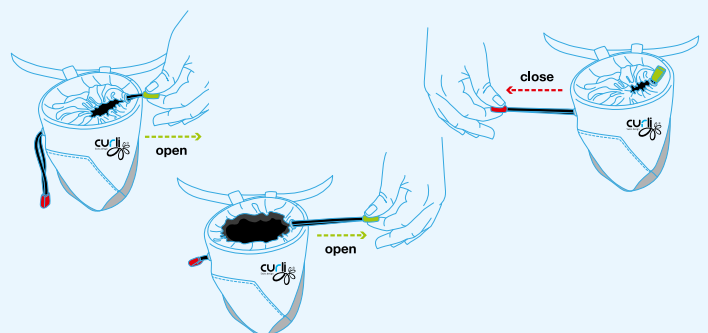

Training with style

In our experience, training with treats works best if you have a treat easily available at any time. That's why we developed the curli Treat Bag, which is manageable with one hand. Open the bag, take out a treat and close the bag again. The elegantly shaped funnel bag is smooth, completely intuitive and doesn't involve complex mechanisms. This way, you can completely focus your attention on your training and interacting with your dog.

Function & Design

- Innovative locking system which can be operated with one hand
- Patch pocket for the clicker or other small tools for training
- Nylon waist strap with light aluminum buckle 110 cm / 3.6 feet long
- Inner bag made of waterproof nylon material
- Abrasion-proof and easy to clean polyester outer material
- Diameter 11.5 cm / 4.5 inch, height 18.5 cm / 7.2 inch
